

We believe it is essential to democracy that you allow, enable, and foster debate on the issue BEFORE you vote on the number of licenses which a single entity can hold. Why the rush to vote in June? If you make a mistake, how are you going to correct it? The airways belong to the people of America. Democracy is not served by ignorance.

We urge you to limit the number of news outlets that can be owned by one owner. An information monopoly is not the servant of a democratic society. It does not protect the expression of views critical and/or constructive that are not the views of the station owners or their program sponsors. As more and more people depend upon electronic media for information, it is essential to our democratic process that multiple station licenses be available for the expression of the public's ideas. Freedom of speech is an empty phrase if the means by which that speech may be heard is monopolized. Please support Radio
